Title of Article: The Impact of Globalization on Foreign Direct Investments in Nigeria.

Author(s): Adetiloye, K. A. and Olokoyo, F. O.
Abstract: The study analysed the globalization index released yearly by A.T. Kearny to establish the improvement Nigeria has made in its effort at attracting Foreign Direct Investment into the country. The study found out that Nigeria is opening up at a slower rate than the world is being globalized. It therefore suggests that Nigeria would need to open up at a greater pace in order to attract the quantum of foreign direct investment that would assist in developing the country at the required growth rate.
