ARC421: Architectural Design VI (4 Credit Units)

Department of Architecture

Covenant University
1. ARC421
1.1. ARC421: Architectural Design VI (4 Credit Units)

This course is a continuation of ARC321 and it introduces the student to complex architectural design projects. Students are to be expected to undertake design tasks in key areas of Architecture of Buildings (Individual and groups of Buildings) and Architecture of Towns and Cities (Housing and Industrial Developments, Neighbourhood Design, Urban Renewal/Regeneration, Transportation, Commercial and Recreational Facilities etc.). Difficult terrain would be suitable for the design projects to enable students display a clear understanding of how to maximize the opportunities and constraints provided by such topography.
