SOC215 Sociology of Science & Technology (2 Units)

Department of Sociology

Covenant University
1. SOC215

1.1. SOC215 Sociology of Science & Technology (2 Units)

This course considers the social determination of knowledge and examines the relationship between science and technology and social and cultural institutions. Similarities and differences between scientific modes of thinking and those governing other human activities are also discussed. The technology and development process of nations are treated in the course. Knowledge systems that govern cumulative technology in human society are examined. The relationship between science and technology is also given a place in the course.
