CHE312 Chemical Engineering Laboratory I (2 units)

Department of Chemical Engineering

Covenant University
1. CHE312
1.1. CHE312 Chemical Engineering Laboratory I (2 units)

Laboratory session will be based on the courses to be taught during the session- these include:

Distribution, Coefficient, cooling tower, Sedimentation, Fluid flow in packed columns, Flow Measuring Apparatus etc. All laboratory courses are compulsory. Overall grade will consist of 2 parts: (a) written exam at end of laboratory session 25% (b) laboratory report grading (75%). Any student absent from laboratory session with official permission will have to perform the session at suitable date. Average score of reports on all laboratory sessions.
