**Abstract:** The study examined the implications of microfinance and gender development policy on Millennium Development Goals (MDGs). The study revealed that there a significant positive relationship between microfinance banks and achievement of gender balance of MDGs. It recommended that to enhance the promotion and development of women which could culminate in increase in their productivity, reduction of maternal and infant mortality as well as increase in life expectancy among women, MDG's goal 3 should be incorporated into credit facility of Nigerian microfinance banks.
